

NEIGHBORHOOD FUNCTIONS

Mr. Bharat is a professor in Social science and today, with his son Varun, discussing some things.

-- Ruchit.

Let's take the case of a family which is new in our locality...

Yaa, why not.

!!!

Research : Families with children are more likely to engage with neighbors.

And this is why people trust on them than a couple without child.

Yah, this research is quite an interesting but we are not going deeper.

No worries, That's fine. But is there challenges to the method ?

Yes, there are 2 recurring themes.

First, we have no simple way to understand 2 different neighborhoods or make a general statements .

And second !?

Yes, I am just going to ask the difference between urban and rural analysis.

It is... we may loosing some functions due to urbanization.

I think, I also can go for Social science.

NO, right now, you are not going anywhere, come to the dinner.

The end.

Yes mom, we are are not going anywhere just coming there.
